

To Whom It May Concern, It has been brought to my attewntion that there are attempts afoot to curtail the services of XM Radio. As a traveler, XM is of great benifit to me. I pay a fee for the services offered, so it should not be considered that XM services are free. When I arrive in a city traffic is of great concern. XM is available before I arrive and allows me to re paln my route if neccessary. Local radio does not offer the level of service nor can it be found with much searching. Becuase of the great service XM offers please reject NAB petition 04-160. This is not in thye publics intrerest
